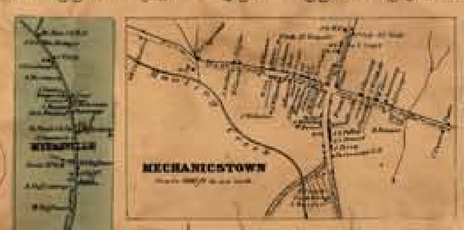
MAP OF FREDERICK COUNTY Md

ACCURATELY DRAWN
From Correct Instrumental Surveys
OF ALL THE COUNTY ROADS, &c.
BY ISAAC BOND C.E.

Scale of Miles

Lithographed by E. Sachse & Co. Sun Iron Building Baltimore Md.



Harpers Ferry & Westernt Steps-Foot Bridge Road and way to cross Pike 1½ & the Toll Gate

EXPLANATIONS.

——— Rail Roads ——— Turnpikes, Plank Roads, &c. ——— County Roads. Neighborhood Roads, or roads not of the county not laid down by actual survey.

Square dots (• • •) indicate the positions of dwellings when connected with names of persons, but Churches, Mills, &c. when connected with any of the following Abbreviations, viz: Ch—Church, and B—Baptist, C—Catholic, E—Episcopal, G B—German Baptist or Dunker, G R—German Reformed, L—Lutheran, M E—Methodist Episcopal, M P—Methodist Protestant, P—Presbyterian, U B—United Brethren; F M H—Friends Meeting House.

P Sch—Primary School, Sch—School, Sem. Seminary, F Sem—Female Seminary.

B S—Blacksmith Shop, and W W—Wheelwright Shop.

C F—Cotton Factory, W F—Woolen Factory.

G M—Grist Mill, S M—Merchant Mill, S M—Saw Mill, M S M or S M M—Merchant and Saw Mill, and G S M or S G M—Grist and Saw Mill.

P E—Private Establishment, P O—Post Office, T Y—Tan Yard.

The names of Voting places are printed in small capitals.

DISTANCES, in miles, between the intersections of roads, are indicated by figures placed near the roads.

MILE-STONES, along turnpikes, &c., are marked by short lines crossing the pike, 1 inch apart, and generally numbered.

INCHES on the map, will correspond to Miles on the ground in all directions.

THE COMMON COURSE, 7 miles (mile) apart, outlines the Subdivisions, in straight lines, from the crossing of Market and Patrick Streets in Frederick City, and from this point, to the shortest public road, to Buckeystown, is 4½ miles; to Buckeystown 6; Burkittsville, 11; Creagerstown, 12½; Emmitsburg, 21½; Greenchase, 18; Johnsville, 14½; Liberty, 17½; Mount Pleasant, 6; Myersville, 12; New London, 8½; Pt. of Rocks, 13½; Sabillasville, 22; Urbana, 7½; Wolf's-ravern, 16½; Walkersville 10.

From the junction of Rarch and Rock Creeks, at the Pa. line, to mouth of Monocacy, by the course of the stream, is 58 miles; in a straight line, 24, and to Westertown, 30 miles, which is the longest straight line that can be drawn entirely in the County. From mouth of Monocacy, due north, to Mason & Dixon's line, is nearly 24 miles; to mouth of Carroll Creek, by course of the stream, is 18½; and to mouth of Double Pipe Creek, 11.

SURFACE, SOIL, &c.

Districts No. 6 and 8, and the northwest parts of 3, 4, 5 and 10, are mountainous, producing little but timber, except in the vale, and beautiful Harbaugh and Sylvan Valleys, about Walkersville and Wolf's-ravern, and in a few other spots.

No. 10, 9, 12 and 14, form the hilly but productive and picturesque Middletown Valley. All the foregoing are drained by Catoctin, Mill Stone, or Sandstone, interspersed with Iron, Gypsum, &c.

East of the Catoctin Mountain stretches the "Red Lands,"—a narrow strip through Nos. 1 and 3, embracing such Valley Farms, but considerably over all the eastern parts of Nos. 4, 7 and 13, the northwest parts of 11, 12 and Carroll County, and formed from Red Clay Shale or Shale (silting or hilly), and subject to washings, with Limestone near Buckeystown, and rock from our three mile stone.

The eastern portions of 1 and 2, with the northwest of 10 and south west of 11, have a rich and hard or beautifully rolling Limestone valley.

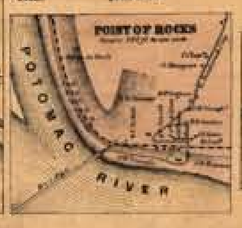
The remainder of the County is hilly or very hilly, composed of various kinds of Shale interspersed with Limestone, Iron, Sandstone, &c., and Copper near Liberty. Shale is of every grade of fertility, from the most important valleys of Linganore, Owens Creek, Fish Creek and Bush Creek, to the sterile hills east of Israel's Creek and Monocacy, the top and Sugar Leaf Mountain and the Barrens or Pat's Ridge.

An almost unbroken ridge of limestone passes east of Buckeystown, east of Woodsborough and Mount Pleasant, &c.

FOR CHILDREN'S FIRST LESSONS ABOUT MAPS.—Spread the map upon a table or cross floor, with the right hand side toward the master, and the left hand side toward the scholar, to make it correspond with the country. The bottom and top may be rolled up to within 4 inches of a foot of home, to admit of getting near that part.

Then the teacher should look over the map in a line with home but every place they collide, and then have a good set to discover, from home, &c.

They should not be wearied with long lessons, but should travel in a few things at a time, (if they are well fixed in the mind,) remembering that 1 new fact or close idea every day, will amount to more than 300 in a year, or 3000 in 10 years, while merely 1000 important ones are found in the school geography of the whole world.



POPULATION OF THE COUNTY.

YEAR	WHITE	F. Color'd	SLAVES
1840	20,973	2,995	4,245
1850	23,314	2,569	3,912
